Leeds, West Yorkshire

LS10 4QB

+44 07462092647

lishaw620@gmail.com

DOB: 22/02/2006

EXPERIENCE

OCS, Cushman & Wakefield (Birmingham),

November 2024- January 2026,

OCS, Sulzer Pumps (Leeds), — Cleaner

January 2026 - PRESENT

My duties at this job include:

- Maintaining a sanitised, dust free and organised work space for the health and safety of everyone.
- Consistently performing tasks to high standards for company pride and excellent impressions on clients.
- Efficiently completing all work with excellent time management and attention to detail.
- Preparing meeting rooms for staff and clients by fully cleaning the room and providing food and beverages.

How I will apply these skills to Software development:

This role has developed my reliability, attention to detail, organisation, ability to work independently, and in a team, as well as my ability to understand and successfully meet clients' standards.. I'm looking to transfer these skills into a technology-based career.

Cancer Research UK, Birmingham— Fundraiser

May 2024- May 2024

Here, I had a good time meeting all types of people and hearing their stories- even during heavy conversations. Despite the tragic tone of the environment, it was a positive experience to hear people's stories and provide people with information on Cancer Research UK.

Here I learned sales pitching.

Pizza Pan, Birmingham— Kitchen Assistant

October 2022- November 2023

My duties, here, included:

- Taking phone, online and in store orders.

SKILLS

Organisation, time management, team coordination, attention to detail, efficiency, reliability, ability to work independently and in a team, creativity.

Education

BMet Sutton College: Level 1 diploma in Applied Science.

The Streetly Academy: GCSE- Maths(6), English (4), Science(6), ICT(5), History(5), Art(7).

Certificates

Driving Licence

Level 1 Diploma in Applied Science.

-Entering online orders into a digital system in order to be printed.

- With excellent attention to detail, I was responsible for entering orders correctly into the system, preparing takeaway bags, while ensuring nothing was missing, checking all prepared orders to ensure that they were correct, while also checking that any special requests were acknowledged.

- I also was responsible for cutting all the pizzas, once made, and coordinating our team of deliveries and allocating orders based on location and delivery time.

This role significantly developed my skills in: fast paced work, organisation, attention to detail and also gave me some experience in team management and coordination, which I believe could become valuable assets of a career in software development.

PROJECTS

My projects are currently still in planning— *Check out my portfolio for more details: [Lisha Watkins Portfolio](#)*

At this time, I have only purchased my coding equipment, such as a PC, within the past few weeks. I plan to begin working on my projects very soon and I am very excited. You can see a display of my project plans (and soon also my completed projects) in my portfolio, which is linked above. If you are interested in viewing my learning process, I have linked my LinkedIn, which is linked under my name, where I post videos displaying my processes.

Thank you.
